**§ 220-21. Planned Industrial/Corporate Center Zone (PC-1).
[Added 8-29-2000 by Ord. No. 569]**

A. Purpose. This zone is intended to provide for industrial redevelopment or reuse of vacant structures or underutilized industrial properties within the Borough. The goal of the PC-1 Zone is to seek redevelopment by way of the creation of low-impact industrial and/or corporate initiatives which would best complement a built community while seeking those uses which would provide employment opportunities to the citizens within the Manheim Central Region. These initiatives should include conversion of larger underutilized structures into incubator facilities designed to support small start-up industries and businesses as well as demolition of existing structures in order to make way for new industry. The zone shall permit retail operations only as accessory uses to on-site manufacturing operation(s). Warehouse operations shall be limited to those which support on-site operations or which are designed as warehouse and distribution centers for related uses, such as construction trade services. Businesses that provide support for the employees will also need to be provided for on a limited basis (i.e., restaurants, newsstand, coffee shop, etc.).

- (1) Additionally, the zone has been designed to incorporate a bulk of the properties formerly associated with Raybestos Manhattan, Inc./Raymark, Inc., including properties which were previously zoned R-1 and supported agricultural uses. Zoning regulations will continue to protect and provide expansion potential for existing established uses which will no longer be recognized as permitted uses. Under these regulations and laws, a nonconforming use may be permitted to expand by as much as 50% of its current area.
- (2) The minimum and maximum lot area requirements are not stated since it is the intent to permit a variety of industry sizes to cohabitate the zone. The controlling factors related to the creation of any subdivision or land development plan shall be the following:
 - (a) Building size.
 - (b) Setback requirements.
 - (c) Off-street parking.
 - (d) Off-street loading/unloading.
 - (e) Maximum lot coverage criteria.

- (f) Screening.
 - (g) Support facilities.
 - (h) Floodplain and floodway limits.
 - (i) Other factors generally controlled through the zoning and planning process.
- (3) Adaptive reuse of existing industrial uses noted to be Class I or Class II historic resources shall be permitted in accordance with the provisions of § 220-22M, Adaptive use regulations, of the Historic Preservation Overlay Zone. In addition, other conversion opportunities shall be permitted, under the special exception process, in order to take advantage of the unique challenges that the existing structures present.
- (4) Due to the proximity of the PC-1 Zone to the one-hundred-year floodplain, construction of new structures will require that the buildings be elevated or floodproofed to minimize damage. It would also be desirable to create parks and/or walking paths throughout the zone to take advantage of the wetland areas and to provide a positive feature or use of areas where development may be limited or restricted by floodplain regulations. Otherwise, the properties should be developed to their maximum permitted potential, keeping in mind the Manheim Central Region's goal to provide a diversification of employment opportunities to offset job losses effected by the closing of Raymark, Inc., Universal Friction Composites, Inc., and Agway. Redevelopment designs will also need to address retrofitting of existing buildings to address flooding and ways to protect materials, equipment, furnishings, buildings and occupants as well as methods to reduce flooding and other stormwater problems through the reduction of existing impervious surfaces, the creation of flood buffers or relief channels, the planting of riparian buffers, etc. Specifically, park and recreational facilities shall be designed to inhabit those less desirable portions of the property where flooding, wetlands and stormwater issues exist.
- B. Permitted uses. (*Indicates term is defined in § 220-12 of this chapter.)
- (1) Bakery.
 - (2) Commercial office incubator.

- (3) Computer industries.
 - (4) Industrial incubator.
 - (5) Machine shops.
 - (6) Manufacturing.* (Restricted to those operations which do not generally create a nuisance, i.e., noise, dust, odor, smoke, fire, glare, etc.)
 - (7) Medical and dental laboratories serving the medical and dental industries.
 - (8) Offices.*
 - (9) Public and nonprofit parks and playgrounds.*
 - (10) Public uses and public utility structures.
 - (11) Research and development laboratories.
 - (12) Retail* (Restricted to sales outlets which serve as an accessory use to an on-site principal manufacturing facility.)
 - (13) Shops for contractors of plumbing, heating, air conditioning, electrical, roofing, siding, flooring, glass and windows, insulation, carpentry, cabinetmaking and other similar construction trade services.
 - (14) Sign makers.
 - (15) Telecommunications facilities except for wireless and cellular communications antennas and antenna support structures/towers and cellular sites, which are permitted by conditional use (see Subsection D).
 - (16) Warehousing as an accessory use to an on-site permitted use.
 - (17) Wetland mitigation facilities and other similar or related conservation uses.
 - (18) Accessory uses customarily incidental to the above permitted uses, provided that no detached accessory buildings or structures shall be permitted except as may be required to enclose HVAC, mechanical, telephone, electrical or other similar equipment.
- C. Special exception uses. (*Indicates term is defined in § 220-12 of this chapter.) In addition to the uses noted in Subsection B, the following uses shall be permitted within structures which exist on

the effective date of this article, provided the application complies with specific criteria provided herein:

- (1) Architectural warehouse. [See § 220-22M(4)(b) for definition and criteria.]
- (2) Caterers. (See § 220-84.)
- (3) Computer training facilities. (See § 220-85.)
- (4) Conversion apartments (see § 220-60), provided the first/ground floor is occupied by or reserved for a nonresidential use permitted by the provisions of Subsections B and/or C.
- (5) Dance, performing arts and/or music studios. [See § 220-22M(4)(d).]
- (6) Health and fitness club* or karate studio. (See § 220-86.)
- (7) Industrial museum. [See § 220-22M(4)(g).]
- (8) Medical or dental clinic*. (See § 220-87.)
- (9) Microbrewery. (See § 220-88.)
- (10) Mini warehouses*. (See § 220-70.)
- (11) Parking garage on the lower level with a permitted use above. (See § 220-89.)
- (12) Schools, public, private, commercial and vocational-mechanical trade*. (See § 220-90.)
- (13) Trail support facilities, including, but not limited to, bike rental or repair shop, public restrooms, snack/ice cream shop, etc. (See § 220-91.)
- (14) Veterinary offices* or animal hospitals. (See § 220-92.)
- (15) Warehousing. (See § 220-93.)
- (16) Restaurants without a drive-through facility; however, restaurants may include an outdoor cafe as an accessory use. (See § 220-74.) **[Added 7-12-2011 by Ord. No. 622]**

D. Conditional uses.

- (1) Wireless and cellular communications antenna and antenna support structures/towers and cellular sites (as defined by Ordinance No. 567, see § 220-83A).
- (2) Agribusinesses. (See § 220-94.)

- (3) Community rehabilitation facilities. (See § 220-95.) **[Added 7-12-2011 by Ord. No. 622]**¹
- (4) Group care and treatment center. (See § 220-95.) **[Added 7-12-2011 by Ord. No. 622]**
- E. Number of uses permitted. Any number of permitted uses listed under Subsection C may be established within any building which existed on the effective date of this chapter, provided the building size and floor area shall not be increased in any fashion, and provided the application meets the following design criteria, as noted herein, for off-street parking, off-street loading and unloading, outdoor storage and display, dumpster and recycling facilities, driveway and access drive requirements, landscaping and commercial operation standards. Any number of permitted uses listed under Subsection B may be established within a new structure, provided the application meets all applicable design criteria as are provided within this chapter or the general provisions of Article III. For existing buildings that are enlarged, only one principal use shall be permitted. It shall be further understood that the application shall meet all provisions and conditions as they are found in the Manheim Borough Floodplain Ordinance, Ordinance No. 486, Chapter 124, as if they were incorporated herein.²
- F. Lot area. Unless otherwise specified, there shall be no minimum lot area requirements in this zone. Each lot or lease area shall be of ample area to adequately provide for off-street parking, off-street loading and unloading facilities, driveway and access drives, dumpster and recycling facilities, landscape/buffer areas, minimum building setbacks and maximum lot coverage criteria and other related criteria as may be required by the provisions of this section.
- G. Minimum lot width. Unless otherwise specified, there shall be no minimum lot width requirement in this zone. However, each lot or lease area shall be of adequate width to provide for the infrastructure required by the provisions of this section.
- H. Minimum setback requirements.
 - (1) The following design criteria shall apply to the development of previously undeveloped land within the PC-1 Zone:

1. Editor's Note: This ordinance also repealed original Subsection C, Restaurants.

2. Editor's Note: Ord. No. 486 was superseded 6-28-2005 by Ord. No. 591, as amended.

- (a) The minimum building setback for principal structures shall be 80 feet from any front property line or public right-of-way.
 - (b) The minimum building setback for principal structures shall be 70 feet from any side property or lease line.
 - (c) The minimum building setback for principal structures shall be 100 feet from any rear property or lease line.
 - (d) Macadam associated with off-street parking, loading and/or unloading areas shall be set back 15 feet from any front, side or rear property or lease line, except in those cases where the property or lease line is designed to be part of a joint parking lot, loading/unloading zone as described in Subsection P.
- (2) The following design criteria shall apply to redevelopment of existing developed tracts wherein buildings are to be demolished:
- (a) No structure shall be rebuilt or expanded to a point closer than 50 feet to a public right-of-way or front property line.
 - (b) No structure shall be expanded or placed between existing structures which would reduce the clear area between buildings to less than 120 feet.
 - (c) Macadam associated with off-street parking, loading/unloading areas shall be set back 10 feet from any front, side or rear property line, lease line or right-of-way, except in those cases where the property or lease line is designed to be part of a joint parking lot, loading/unloading zone as described in Subsection P.
 - (d) All areas not required for off-street parking, drives, loading/unloading areas, dumpster and recycling facilities shall be converted into landscaping. For this purpose, the maximum lot coverage criteria shall be waived, provided that the post-development plan creates more pervious surface area than exists at the predevelopment stage.
- (3) Multiple principal structures on the same property shall be permitted, provided the following distances are maintained between the structures:

- (a) One hundred forty feet between the side walls of adjacent structures.
 - (b) Two hundred feet between the rear walls of adjacent structures.
 - (c) One hundred sixty feet between any side building wall and an adjacent rear building wall.
- I. Maximum permitted height. New structures shall not be constructed higher than three stories in height or a maximum of 42 feet above the average exterior grade elevation. (The average exterior grade elevation should be within four feet of the first-floor elevation, especially in one-hundred-year floodplain areas.)
- J. Minimum first-floor elevation. The minimum first-floor elevation for any new building proposed to be constructed within the one-hundred-year floodplain, or on property which is found to be flood-prone, shall be two feet above the base one-hundred-year floodplain elevation.
- K. Maximum lot coverage: 70%, for the development of previously undeveloped land. [See Subsection G(2)(d) with reference to redevelopment of existing developed tracts.]
- L. Outdoor storage and display. Exterior storage of materials or display of products shall be restricted to rear and side yard areas, provided the materials being stored or displayed are not visible from the property line; and further provided that the area is screened from all adjoining properties, roads, public walkways, bike paths and open space/park areas. Screening methods may be utilized to assure that materials will not be visible from the front property line. No outdoor storage or display area shall be placed within a floodway, within 50 feet of a road or residentially zoned property, or within 30 feet of a public walkway, bike path, open space/park area. Otherwise, the outdoor storage or display area shall not be less than 20 feet from any side or rear property line. Outdoor storage and/or display areas which are proposed to be located within the one-hundred-year floodplain or on property which is found to be flood-prone shall be elevated so that the grade is no less than two feet higher than the base one-hundred-year floodplain elevation.
- M. Dumpster and recycling facilities. Dumpster and/or recycling facilities shall be permitted to be created within the side or rear yard area, provided that the receptacles are screened from all adjoining properties, roads, public walkways, bike paths and open

space/park areas. No dumpster or recycling facility shall be placed within a floodway or within 50 feet of a road, public walkway, bike path, open space/park area or any residentially zoned property. Otherwise the dumpster and/or recycling facility shall not be less than 25 feet from any side or rear property line. All receptacles provided for the collection and storage of waste and/or recyclables shall be provided with a weather-tight lid and operating door panels. Dumpster and recycling facilities which are proposed to be placed within the one-hundred-year floodplain or on property which is found to be flood-prone shall be elevated so that grade is no less than two feet higher than the base one-hundred-year floodplain elevation.

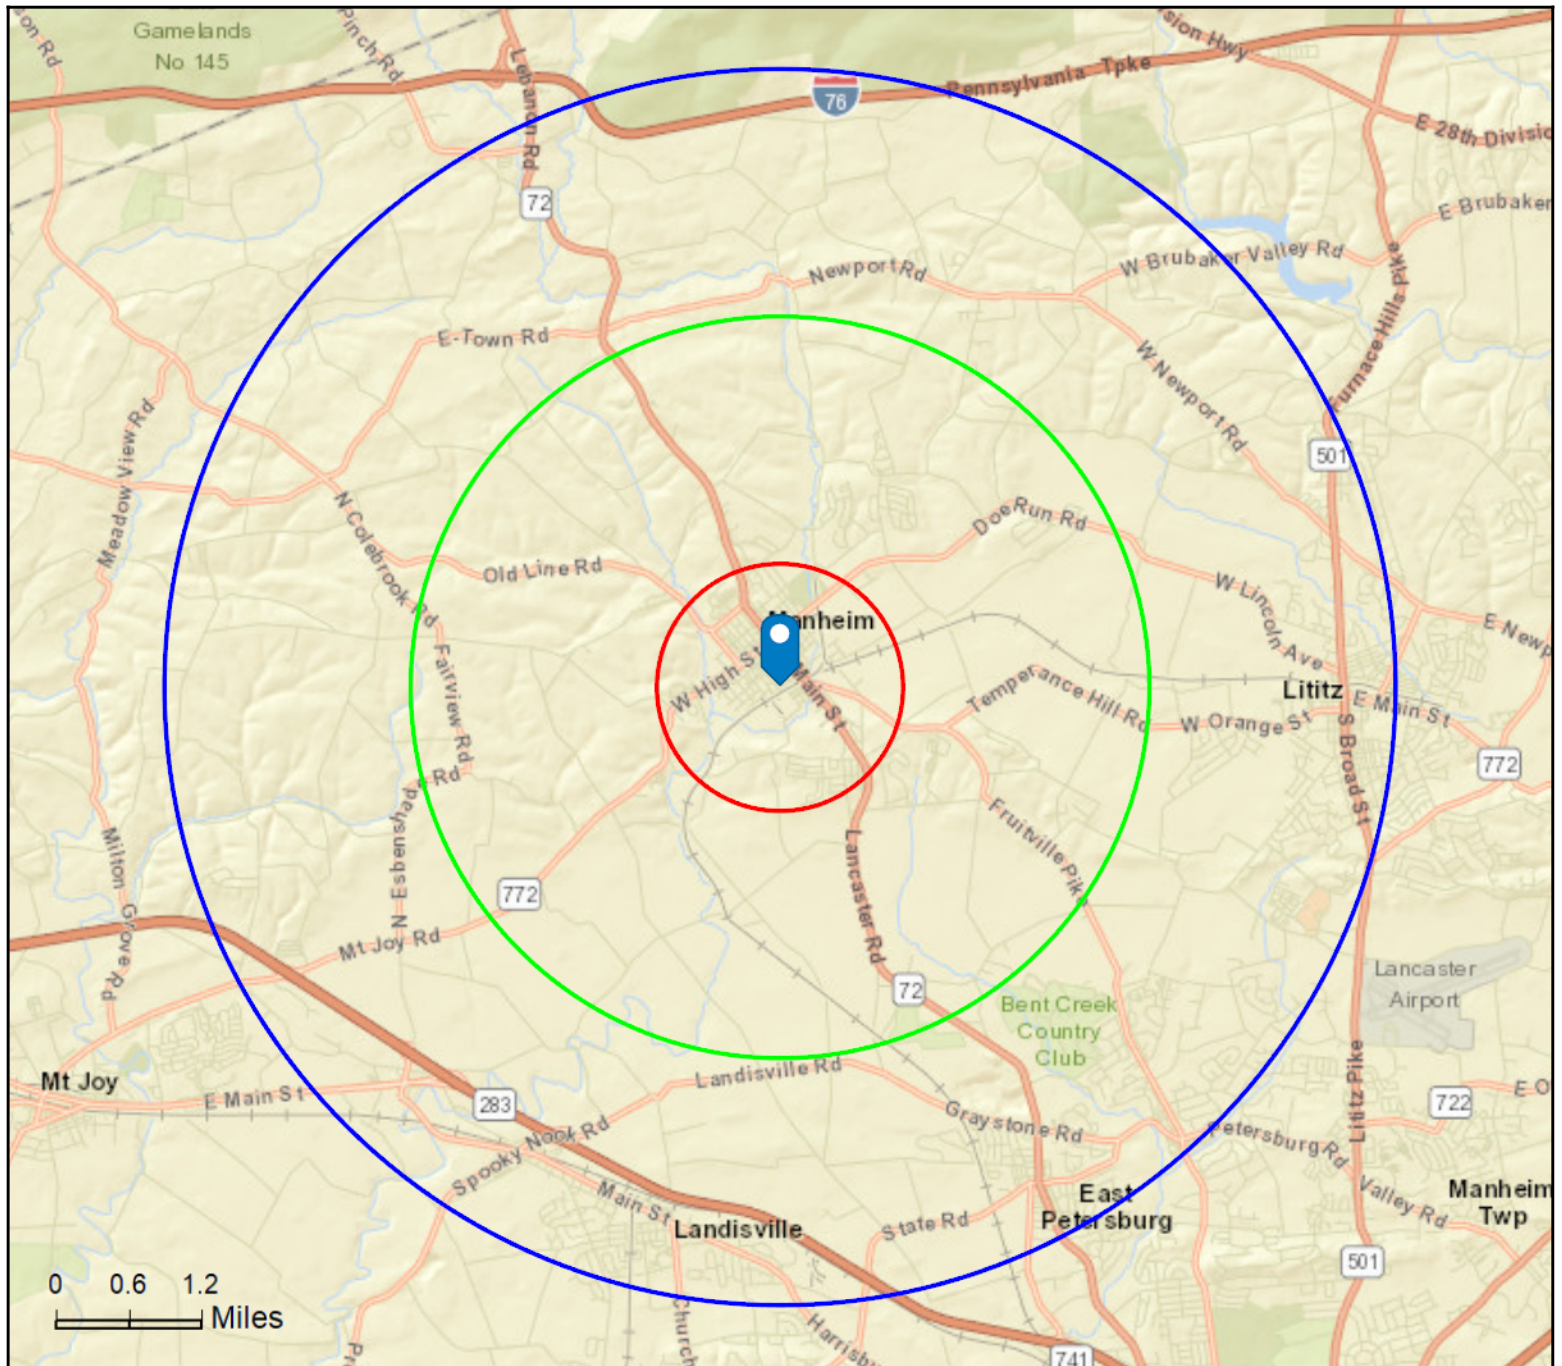

- N. Off-street parking. Off-street parking shall be provided as specified in § 220-33 of this chapter. Section 220-33T shall not apply to uses in the PC-1 Zone.
- O. Off-street loading and unloading. Off-street loading and unloading shall be provided as specified in § 220-34 of this chapter. In addition, no off-street loading or unloading facility shall be created on the side of the building which faces an adjoining residentially zoned property or an adjoining street.
- P. Joint parking lots, loading and unloading zones. In the PC-1 Zone, the creation of joint off-street parking lots and loading and unloading zones (access drives, etc.) may be permitted. However, the location and configuration of the parking lots shall not require pedestrians to cross loading/unloading zones, driveways utilized by vehicles accessing loading/unloading zones or public rights-of-way which are between the parking lot and the building/structure which it is serving.
- Q. Driveway and access drives. In addition to the provisions of § 220-33N of this chapter, access drives and driveways providing access for trucks shall meet the design controls as found in Chapter 11 of the AASHTO publication, "Geometric Design of Highways and Streets," as last revised. In addition, internal travel lanes to be used by trucks and/or trucks and cars shall be a minimum width of 14 feet per lane of travel. The general provisions of § 220-32 shall also apply.
- R. Landscape buffers. Any and all portions of a site or leased area which is not developed for buildings, concrete walkways, dumpsters and recycling facilities, driveways or access drives, or which is not required for off-street parking, off-street loading or unloading areas, shall be planted with all-season ground cover

which shall be approved by the Borough Planning Commission, following submission of a detailed landscape plan, which shall list all materials incorporated in the design layout. Where they are consistent with the pervious statement, the general provisions of § 220-35 shall also apply.

- S. Operation standards. All commercial and industrial operations shall be created, maintained and operated in compliance with applicable federal, state, county and local regulations which may govern these types of operations.

2019-2024 Annual Rate	2.41%	2.45%	2.11%

Households by Income

Current median household income is \$75,224 in the area, compared to \$60,548 for all U.S. households. Median household income is projected to be \$81,140 in five years, compared to \$69,180 for all U.S. households

Current average household income is \$94,999 in this area, compared to \$87,398 for all U.S. households. Average household income is projected to be \$105,585 in five years, compared to \$99,638 for all U.S. households

Current per capita income is \$36,702 in the area, compared to the U.S. per capita income of \$33,028. The per capita income is projected to be \$40,734 in five years, compared to \$36,530 for all U.S. households

Housing			
2019 Housing Affordability Index	124	131	142
2000 Total Housing Units	2,386	4,816	15,553
2000 Owner Occupied Housing Units	1,566	3,455	11,734
2000 Renter Occupied Housing Units	722	1,211	3,374
2000 Vacant Housing Units	98	150	445
2010 Total Housing Units	2,534	5,608	17,718
2010 Owner Occupied Housing Units	1,678	4,013	13,109
2010 Renter Occupied Housing Units	739	1,375	3,885
2010 Vacant Housing Units	117	220	724
2019 Total Housing Units	2,692	6,049	19,172
2019 Owner Occupied Housing Units	1,640	4,031	13,637
2019 Renter Occupied Housing Units	896	1,725	4,657
2019 Vacant Housing Units	155	293	878
2024 Total Housing Units	2,780	6,249	19,821
2024 Owner Occupied Housing Units	1,694	4,178	14,060
2024 Renter Occupied Housing Units	921	1,757	4,835
2024 Vacant Housing Units	165	314	926

Currently, 71.1% of the 19,172 housing units in the area are owner occupied; 24.3%, renter occupied; and 4.6% are vacant. Currently, in the U.S., 56.4% of the housing units in the area are owner occupied; 32.4% are renter occupied; and 11.2% are vacant. In 2010, there were 17,718 housing units in the area - 74.0% owner occupied, 21.9% renter occupied, and 4.1% vacant. The annual rate of change in housing units since 2010 is 3.57%. Median home value in the area is \$225,169, compared to a median home value of \$234,154 for the U.S. In five years, median value is projected to change by 2.07% annually to \$249,480.

Data Note: Income is expressed in current dollars. Housing Affordability Index and Percent of Income for Mortgage calculations are only available for areas with 50 or more owner-occupied housing units.
